SUBJECT INDEX

Accelerated aging, p. 524
Acoustic emission, p. 29
Acoustic impact technique, p. 280
Active and passive control, p. 1160
Adaptive actuators, p. 1160
Adhesive joint, p. 949
Adhesives, p. 752
Adiabatic model, p. 847
Analytical solution, p. 1081
Anisotropic fiber mat, p. 1108
Annealing, p. 1054
Antisymmetric bending, p. 723
Arc length, p. 1317
Aspect ratio, pp. 349, 910
Axisymmetric modeling, p. 1337
Beam, pp. 349, 378
  box, p. 128
  pultruded, p. 378
Bending analysis, pp. 723, 1226
Biomass, p. 458
Bonding composites to concrete, p. 949
Boundary problems, p. 418
Buckling, pp. 378, 752
Bulk molding compound, p. 297
Carbon-epoxy, pp. 349, 804, 1008, 1121
Carbon fiber knitted fabric, p. 1121
Cartesian shaped, p. 495
Chlorinated polyethylene, p. 458
Clamped boundary, p. 1226
Composite defects, p. 280
Composite impact behavior, p. 799
Composite materials, pp. 211, 333, 652, 949, 965, 1043
Composite sandwich, p. 402
Composite skins, p. 1160
Composite stress-strain curve, p. 2
Composite structures, pp. 85, 143, 164, 402
Composite tensile strength, p. 2
Composite tubes, p. 1121
Composites, pp. 85, 113, 128, 196, 333, 349, 378, 458, 588, 618, 752, 799, 804, 889, 910, 1008, 1081, 1175, 1199, 1317
  boron/epoxy, p. 923
  carbon/carbon, p. 1337
  fiber, pp. 143, 471
  fiber-reinforced polymer, pp. 559, 588
  knitted fabric, p. 1121
  knitted fabric reinforced, pp. 786, 1032
  laminated, p. 427
  plain weave RTM, p. 1199
  polymer, p. 866
  short-fiber reinforced, p. 333
  textile, p. 1121
  thermoset, p. 72
  thick, p. 255
  two phase isotropic, p. 1144
  unidirectional, p. 29
Compression molding, p. 60
Computational simulation, p. 143
Concrete reinforcement, p. 524
Conical shell, p. 923
Constitutive relation, p. 740
Constrained torsion, p. 29
Contour mapping, p. 495
Control volume finite element, p. 310
Corrosion resistance, p. 72
Coupling agent, p. 458
Crash worthiness, p. 1121
Creep, pp. 128, 588
Critical fiber length, p. 2
C-scan, p. 362
Cure analysis, p. 297
Cure control, p. 297
Cure extent, p. 988
Cure kinetics, pp. 72, 847
Cut edge area, p. 513
Cut plies, p. 45
Cylindrical shells, p. 652
Damage, pp. 85, 1175
Damage model, p. 233
Damage tolerance, pp. 85, 1150
Damping, pp. 196, 923, 1160
Degradation, p. 85
Degree of cure, p. 495
Delamination, pp. 45, 280, 1150
Delamination crack growth, p. 804
Delamination growth, p. 1150
Dielectric analysis, p. 297

Dielectric cure monitoring, p. 297
Differential equations, p. 418
Differential scanning calorimeter, p. 495
Diffusion coefficient, p. 513
Dimensional stability, p. 458
Discontinuous inclusions, p. 1307
Discrete-layer theory, p. 652
Distribution of composite strength, p. 2
Drop weight impact testing, p. 1150
Dynamic behavior, p. 196
Dynamic response, p. 255
Edge effect, p. 694
E-glass, p. 1175
Elastic constants, p. 1144
Elasticity theory, p. 418
Elastomers, p. 458
Empirical model, p. 1069
Energy absorption, p. 1121
Energy density function, p. 1307
Enumerating significant failure modes, p. 427
Environmental exposure effects, pp. 559, 949
Epoxy resin, p. 495
Failure, p. 965
Failure criteria, p. 211
Failure envelope, p. 211
Failure stresses, p. 211
Fatigue, pp. 524, 804, 965, 1054
Fiber bundle breakage process, p. 2
Fiber-matrix interaction, p. 2
Fiber reinforced plastics (FRP), pp. 100, 524, 641, 923
Fiber reinforced polymers, p. 752
Fiber reinforcement, p. 866
Fiber strength variation, p. 2
Fiberglass, p. 495
Fibers
  bidirectional woven glass, p. 1108
  cellulosic, p. 458
  woven, p. 1108
Fickian behavior, p. 513
Filament winding, p. 1081
Filament wound pressure vessel, p. 1278
Findley's power law, p. 588
Finite difference, p. 495
Finite element analysis, pp. 143, 255, 827
Finite element method, pp. 196, 233, 1337
  body-fitted, p. 694
  stochastic, p. 675
Flexure, p. 349
Four point bending, p. 45
Fourier method, p. 418
Fracture, pp. 85, 804
Fragmentation process, p. 2
Frame structures, p. 752
Free-edge effect, p. 1043
Free vibration, p. 143
Free volume, p. 1054
Friction material, p. 1337
Friction surfaces, p. 1337
Full-scale testing, p. 378
Fully coupled theory, p. 1337
Galerkin's procedure, p. 923
Geometric nonlinearity, p. 1317
Glass/epoxy, pp. 445, 1121
Glass fiber knitted fabric, p. 1121
Graphite, p. 445
Graphite epoxy, p. 211
GRP, p. 362
Hand-lay-up, p. 128
Heat transfer, pp. 72, 310, 495
Heated mold, p. 1069
Helmholtz's equations, p. 418
Hertzian contact, p. 255
Higher order theory, pp. 1226, 1259
Hygrothermal conditioning, p. 513
Impact damage, pp. 280, 799
Impact energy, p. 1121
Impact fatigue, p. 1150
Impact response, pp. 799, 1175, 1199
Impregnation, p. 1069
Incident energy (critical), p. 1150
Inelastic energy curves, pp. 1175, 1199
Infrastructure, pp. 588, 752, 1008
In-place shear, p. 471
Interface, p. 445
Interlaminar stress, p. 255
Internal state variable approach, p. 233
Intraply cracking, p. 233
Iosipescu, p. 390
Isotropic body, p. 418
Kenaf fiber, p. 458
Knitted fabrics, p. 1121
Knockdown factor, p. 164
Kriging, p. 211
Lagrange multiplier, p. 1226
Laminate temperature, p. 1069
Laminated beams, p. 255

(continued)

Subject Index (continued)
Laminated composite structures, p. 675
Laminated cylinders, p. 143
Laminated cylindrical shells, p. 1081
Laminated faces, p. 723
Laminated shells, p. 652
Laminates, pp. 85, 255, 349, 618
  angle-ply, pp. 143, 349, 618, 923
  carbon composite, p. 513
  composite, pp. 740, 827
  cross-ply, pp. 618, 923
  glass epoxy, p. 1150
  quasi-isotropic, p. 1043
  SMC, p. 988
Large rotation displacement, p. 29
Lay-up, pp. 349, 513, 618
Linear inelastic limit, p. 113
Load-deflection behavior, p. 910
Load-strain behavior, p. 910
Longitudinal Young's modulus, p. 1307
Low styrene emission, p. 100
Mass matrix, p. 618
Matrix, p. 445
Matrix anisotropy, p. 889
Matrix cracking, pp. 1150, 1252
Mechanical behavior, pp. 804, 988
Mechanical loads, p. 524
Mechanical properties, pp. 458, 524, 641, 1054
Microcellular foam, p. 1054
Micromechanics, p. 471
Mixer-mode delamination behavior, p. 804
Mixed variational theorem, p. 723
Mode shape, p. 143
Modified polyethylene, p. 458
Moisture, p. 143
Moisture absorption, p. 513
Moisture induced damage, p. 280
Mold filling, p. 310
Monte Carlo method, p. 427
Natural fibers, pp. 641, 866
Natural frequencies, pp. 143, 196
Nondestructive testing, pp. 280, 362
Nonisothermal filling, p. 1069
Nonisothermal mold filling and curing, p. 310
Nonlinear amplitude, p. 1160
Nonlinear finite element analysis, p. 1278
Nonlinear frequency, p. 1160
Nonsymmetric constrained cracking, p. 740
Normal stress, p. 29
n-Phase composite body, p. 1307
Numerical analysis, p. 255
Numerical methods, p. 495
Numerical simulation, pp. 310, 641
Open-web profiles, p. 752
Orthotropic body, p. 418
Orthotropic core, p. 723
Permeability, p. 1108
Permeability measurement, p. 1108
Plane strain, p. 349
Plane stress, p. 349
Plate
  angle-ply, p. 1226
  clamped layered composite, p. 1259
  composite, p. 799
  cross-ply, p. 1226
  laminated, p. 1226
  symmetric sandwich, p. 723
Polycarbonate, p. 1054
Polymer composite materials, p. 1121
Polymer-matrix compounds, p. 866
Postbuckling, p. 827
Postbuckling ultimate load, p. 827
Preform architecture, p. 1175
Preloads, p. 1081
Prepeg sheet, p. 100
Pressure distribution, p. 1337
Pressure vessel, p. 1081
Probabilistic structural analysis, p. 675
Process simulation, p. 72
Processing temperature, p. 1252
Progressive crushing, p. 1121
Progressive failure, pp. 827, 1278
Pull-out, p. 524
Pultruder design, p. 495
Pultrusion, pp. 390, 495, 752
PVC cores, p. 402
Random structures, p. 675
Recycled plastic, p. 458
Recycled polyethylene, p. 458
Reinforced plastic rebars, p. 910
Reinforced plastics, p. 72
Reinforced polymers, p. 641
Reliability analysis, p. 427
Repeated drop test, p. 1150
Residual stress, pp. 72, 143
Resin transfer molding, pp. 113, 310, 694,

1069, 1108, 1175
Rheology models, p. 847
Rik's method, p. 1317
Sandwich beam, p. 1160
Second moment method, p. 675
SEM, p. 29
Semi-rigid connections, p. 752
Shadow moire, p. 827
Shallow shells, p. 652
Shape memory alloy, p. 1160
Shear deformation, pp. 255, 652
Shear modulus, p. 471
Shear stiffness, p. 390
Shear strength, p. 390
Shear stress, p. 965
Sheet molding compound, p. 297
Short cycle time, p. 100
Simulation model in RTM, p. 310
Smart materials, p. 1160
Snap-through, p. 1317
Solvent sorption, p. 988
Sound velocity, p. 418
Stacking sequence, p. 255
Static analysis, p. 652
Statistical analysis, p. 458
Steady-state oscillations, p. 418
Steady-state solution, p. 1337
Steel stringers, p. 910
Stiffened panel, p. 85
Stiffened shells, pp. 618, 1317
Stiffeners, pp. 752, 1317
Stiffness, pp. 349, 1043
Stiffness degradation, p. 740
Stiffness matrix, p. 618
Strain limit, p. 128
Stress analysis, p. 29
Stress concentration, p. 889
Stress transmission, p. 1307
Stretchable film, p. 100
Stringer-stiffened panel, p. 827
Structural analysis, p. 143
Structural response variabilities, p. 675
Styrene loss, p. 988
Synergetic effect in composite strength system, p. 2
  pressure forming, p. 100
  vacuum forming, p. 100
Temperature fields, p. 1337
Tensile specimen, p. 1043
Tensile stiffness reduction, p. 1043
Thermal behavior of the mold, p. 310
Thermoset resin, pp. 100, 847
Thick beam, p. 196
Thickness distribution, p. 100
Thickness gauging, p. 362
Three-dimensional characterization, p. 495
Three-rail shear test, p. 965
Torque
  additional, p. 29
  applied, p. 29
  effective, p. 29
Torsion, p. 390
Torsion constant, p. 29
Transient dynamic response, p. 618
Transient thermoelastic analysis, p. 1337
Transverse normal effects, p. 723
Transverse shear effects, p. 723
Tsai-Hill failure criterion, p. 427
Ultrasonic, p. 362
Unfolding models, p. 889
Unidirectional glass fibre-epoxy, p. 45
Universal connectors, p. 752
Unsaturated polyester resin, p. 100
UV cure, p. 100
Vibration control, p. 1160
Vinylester, pp. 72, 113
Viscoelastic core, p. 1160
Volume fraction, p. 1150
Weibull distribution, p. 427
